

# Current Iariatsoft Software Projects

- Event Display

- Implement survey geometry: need to understand how old survey was used to generate old G4Beamline file
- Implement Eve framework for event display: learning how to structure Eve event display
- Implement trigger by trigger drawing
- Problem: Do not know coordinate system for WC tracks

- Bezier Tracker

- Adapt module to make trigger associations: Done
- Adapt seed finder, tracker, and possibly spacepoint algorithms to a detector with 2 planes
